Education

RV University — Bengaluru, Karnataka
B.Tech. (Hons.) Computer Science & Engineering — AI/ML Major — *2025 – 2029*
- CGPA: 9.11 / 10.0 — Sem 1: 9.22 — Sem 2: 9.00

Pre-University College (Class XII) — Karnataka
Karnataka State Board — *2024 – 2025*
- Percentage: 91.83%

Technical Skills

Languages: Python, C++, C, JavaScript, SQL
ML & Data: Scikit-learn, XGBoost, NumPy, Pandas, Matplotlib, Streamlit
Concepts: Supervised Learning, Classification, Feature Engineering, Gradient Descent, Model Evaluation
Hardware & IoT: ESP32, Arduino IDE, MPU6050, Sensor Integration
Tools & Platforms: Git, GitHub, VS Code, PostgreSQL, MySQL, React, Node.js

Projects

PhishPrint — Phishing URL Detector | *Python, Scikit-learn, XGBoost, Streamlit* — 2026
- Built an ML-based phishing URL detection system using Random Forest and XGBoost classifiers.
- Engineered 15+ features from URL structure, domain metadata, HTTPS indicators, and lexical patterns.
- Compared model performance using accuracy, precision, recall, and F1-score metrics.
- Deployed an interactive real-time detection interface using Streamlit for end-user URL classification.

Badminton Shot Analyser | *ESP32, MPU6050, PostgreSQL, React, Python* — 2026
- Built an end-to-end sports analytics pipeline combining IoT hardware with a data dashboard.
- Collected real-time 6-axis motion data (acceleration + gyroscope) from ESP32 + MPU6050 sensor.
- Processed and stored sensor data in PostgreSQL; visualized smash force, angle, and consistency metrics via React dashboard.
- Demonstrates applied data pipeline design — from raw sensor input to actionable analytics.

Real-Time Metro Coach Occupancy Monitor | *ESP32, IoT, C++* — 2026
- Designed and deployed an IoT system using ESP32 to collect and transmit real-time coach occupancy data.
- Built data collection infrastructure applicable to crowd density estimation and footfall prediction.
- Awarded **3rd Prize** at RV University Project Exhibition among all second-year projects.

Placement Tracker | *React, Node.js, MySQL, Render* — 2026
- Developed and deployed a full-stack placement preparation tracker with 15+ active users.
- Built RESTful APIs with Node.js and MySQL; deployed on Render with live uptime.
- Manages a structured Discord community for peer-driven interview preparation.

Achievements & Competitive Programming

LeetCode: 350+ problems solved | Contest Rating: 1489 | Max Streak: 130 days | tanish1917
CodeCon 2026: 2nd Place among 350+ participants — Intra-college Coding Competition, RV University
Project Exhibition: 3rd Prize — Real-Time Metro Coach Occupancy Monitor, RV University
